Edumart

For the Second Time after the great Success, egabi Learn has participated in Edumart
The second issue was assigned into two rounds, the first round was held in Cairo University 20-22 November and the second round in Ain Shams University 25- 27 November. The fair was targeting university students and fresh graduates seeking to develop and enhance their career path.
The two rounds reached more than 4000 visitors from different universities and fresh graduates.

SUCCESS ACROSS MEA

MCIT Egypt

Ministry of Communications and Information Technology (MCIT) joined hands with egabi in order to achieve a higher level of quality, they decided to automate the internal operations in a more efficient manner, the automation was implemented through 4 modules, and each module aims to enhance the ministry performance.
The 4 modules are built and integrated over UCM, by automating the internal operations, MCIT faced all the challenges by having a Manual processing which aided to enhance the overall performance which strongly saved the wasted time, eliminated the human mistakes possibility, increased the productivity and provided security
The application was developed using Oracle ADF; the interface was provided in both English & Arabic with a Hijry Calendar and fully integrated with scanners.

Najm KSA

"The Saudi Arabian Monetary Agency (SAMA) and General Traffic Department have appointed Najm for Insurance Services to establish an e-link "NajmNet" that integrates all Motor Insurance companies with Najm and ELM company for information security on behalf of National Information Center. NajmNet is serving as portal and data center to facilitate the integration process and data exchange between all related parties."
Najm being the single point of contact among ELM and the insurance companies, egabi provided Najm with an online application easing the communication among representatives of ELM and the insurance companies across the kingdom playing the role of the middle layer
The project had 4 different modules covering Insurance Policy Management Module - Admin Module - Finance Integration Module Reconciliation Module
